

Maybe a little history of the Dredger is also welcome.

Dutch Bucket Dredger "Weser", bucket capacity 500 liter.
Diesel-Hydraulic with strongly centralised control. Maximum dredging depth with short extension ladder 13.5 m, with long extension ladder 18 m, long extension ladder in its lower position 22 m. Clearance with tilted main gantry 6.75 m. Constructed in 1968-1969

Niederländische Eimerkettenbagger "Weser" . Eimerinhalt 500 liter. Diesel hydraulisch mit stark zentralisierter Bedienung. Baggertiefe mit Normalleiter max 13.5 m, mit verlängerte bzw. waagerechte Leiter 18 m bzw. 22 m.
Schimmhöhe mit gekipptem Eimerleiterbock 6.75 m.
Baujahr 1968-1969

In model built with the original construction plans in scale 1/50 with 1 mm styrene sheets. Only the axes of the winch and the hydraulic cylinders are made from styrene tubes.
The next i foto's wil send with a new mail
I hope the the next year to finish the dredger but there is a lot of work waiting to complete it .

ps without your machine, the High-Z 400 i could not built it.
There for thanks for building this machine

Best regards
Frits W.
